

Problem-Solution Fit

A Comprehensive Measure of Well-Being | HDI Predictor

Problem

No simple interactive tool exists to compute HDI using the official UNDP formula with real country data.

Solution

A web application that implements the UNDP geometric mean formula with 20 country presets and real-time prediction.

Fit Validation

- ■ Users can compute HDI in < 5 seconds
- ■ Results match UNDP published scores within ± 0.005
- ■ Accessible to non-technical users
- ■ Works on all devices without installation
- ■ Free and open source

Unique Value Proposition

The only web app that implements the exact UNDP HDI geometric mean formula with real UNDP HDR 2023/24 country presets, available instantly without any setup.
