

Project Executable Files

A Comprehensive Measure of Well-Being | HDI Predictor

Frontend (React + Vite)

- `npm install` — Install all dependencies
- `npm run dev` — Start dev server at `localhost:8080`
- `npm run build` — Build for production
- `npm run preview` — Preview production build

Flask Backend (ML version)

- `pip install flask scikit-learn pandas numpy` — Install dependencies
- `python train_model.py` — Train and save `model.pkl`
- `python app.py` — Start Flask server at `localhost:5000`

Deployed Application

- Live URL: <https://a-comprehensive-measure-of-well-bei.vercel.app/>
- Auto-deployed via Vercel on every push to main branch

Key Files

- `src/routes/index.tsx` — Main React component
- `Flask/app.py` — Flask backend
- `Flask/model.pkl` — Trained ML model
- `Flask/encoder.pkl` — Country label encoder
- `docs/` — All phase documentation PDFs
