

Scalability & Future Plan

A Comprehensive Measure of Well-Being | HDI Predictor

Current Scale

- 20 country presets
- Client-side computation (no server load)
- Deployed on Vercel Edge Network (global CDN)

Scalability Plan

- Add all 195 UNDP countries with presets
- Connect to live UNDP HDR API for real-time data
- Add database for user prediction history
- Scale Flask backend with Docker + cloud deployment

Future Features

- ■ HDI historical trends (2010–2024)
- ■■ Interactive world choropleth map
- ■■ Gender Inequality Index (GII) predictor
- ■ Random Forest / XGBoost for higher accuracy
- ■ Country side-by-side comparison tool

Long-term Vision

Become the go-to open-source tool for UNDP HDI research, used by students, researchers, and policymakers worldwide.
